Fintech categories

WHAT IT IS

A purpose-built sourcing intelligence platform that maps the entire fintech talent universe relevant to Lean — scored, tiered, and queryable — so the team knows exactly where to source from before a role is even open.

THE FIT SCORING MODEL

Each company scored 1–10 across 5 objective dimensions:

- Culture Fit:** Values alignment, pace, innovation mindset
- Growth Stage:** Company stage matches Lean talent profile
- Function Overlap:** Engineering, Product, Commercial, Compliance present
- Geo Relevance:** UAE/KSA primary · UK/India secondary
- Talent Density:** Headcount volume and senior talent availability

TIER SYSTEM

Tier 1	8.0+	Active sourcing targets — highest priority
Tier 2	5.0–7.9	Strong pipeline — map functions now
Tier 3	< 5.0	Longlist — monitor for signals

AI CAPABILITIES

Fit Scoring Engine

Scored all 372 companies using Lean's values (The Lean Way) + Ashby hiring data — no manual tagging

AI Company Summaries

One-click contextual analysis of why a company is relevant to Lean's talent strategy

Natural Language Chat

Query the entire universe in plain English: "Series B fintechs in UAE with engineering functions"

Weekly Digest

Automated signal analysis runs on schedule — surfaces tier changes and new sourcing opportunities

KEY FEATURES

- Table + Grid view with live fit score breakdown bars
- Company detail pages: enrichment data, score breakdown, AI summary
- Candidate tracking — link sourced people to companies
- Team notes with @mention support per company
- Watchlist — save and monitor priority targets
- Saved searches — bookmark frequent filter combinations
- Tier history — log when and why a company was re-tiered
- CSV import/export — bulk update or extract data
- Dashboard, Categories, Geographies, Tiers intelligence views

Why this matters

Tools like Gem, Findem, and Beamery charge £30–80k/year for generic talent market data. Lean Talent Intelligence is built specifically around Lean's context — our values, our hiring functions, our target markets — at zero software cost. It gives the talent team a structural advantage: we know who to source from before competitors know there's a candidate to find.
